This document was designed to answer questions brought up by the permit engineering staff, industry, and consultants concerning the Title V application forms. This is considered to be a living document; questions will be added and issues will be addressed as they arise.

General

Q: How many copies of the application do I need to submit and to whom?
A: Submit 2 hardcopies, one electronic, and one, if applicable, confidential copy to the Director of Engineering Services, SC DHEC, Bureau of Air Quality. One hardcopy of the application will go to the Regional Office during public notice. The EPA does not generally receive an application during notice; however, if the TV permit is “targeted”, EPA will receive a copy of the application electronically. If the EPA requests a copy of the application for any other reason, the facility is responsible for sending the application.

Q: If there is a confidential application, does this need to be an electronic copy as well?
A: No, confidential information should be sent under a separate, hard cover application.

Q: The application does not have enough lines for multiple emission units, equipment, emissions, etc...
A: More lines can be added in the electronic version (refer to the instructions for the application forms for more information on how to add rows). The facility would print out the electronic version once completed as the hard copy.

Q: How is an application updated during the review process- electronically or hard copy? If the version was sent on a disk, do they need to send a new disk?
A: The facility should update the electronic version as well as the hard copy during the TV permit renewal process. A suggestion would be to e-mail the updated electronic version as needed and then submit the complete updated hard copy at the end of the renewal process (public notice).

Q: What is the time frame (grace period) a facility can use the old TV application forms?
A: After April 1, 2014, the Department will no longer accept Title V applications using the old Title V application forms.

Q: Can a facility use the old TV application forms for submitting an updated TV application?
A: Facilities submitting an updated TV application should use the version of the forms they submitted the original TV application under.

Q: Is a facility required to submit an entire TV application at renewal, or is an abbreviated version appropriate, addressing only the changes that have occurred in the 5-year time frame?
A: The Department is asking that an entire application to be submitted at this time. The new application forms should contain all the information needed for the TV renewal process. A determination will be made in the next renewal cycle whether an entire application or only an update is needed.

10/28/13
Q: On the Regulatory Information form, under emissions limits and standards, there is a note that states “*For sources subject to a MACT Standard, the applicant must submit an electronic copy of the MACT Standard with all applicable requirements highlighted.” Does this apply to all MACT requirements, or just those that are new or changed with the renewal? (As existing MACT requirements are currently outlined in the permit)

A: This applies to all applicable MACT standards.
